DOG TRACKING

With a keen sense of smell –100,000 times stronger than humans – dogs are often used to find lost people and animals, drugs, avalanche and disaster victims and even to detect cancer. Tracking is a canine sport that demonstrates a dog's natural ability to recognize and follow a scent and is the foundation of canine search and rescue work. Unlike obedience and agility trials, where dogs respond to the owner's commands, in tracking a dog is completely in charge. Participants learn to follow the dog, for only he knows how to use his nose to find and follow the track. For many, the greatest pleasure of tracking is the hours spent outside training and interacting with their dogs.

Days: Saturdays
Time: 7:00am – approximately 1 hr long
Fee: \$85.00
