

ST. MARY'S COUNTY BOARD OF APPEALS

In the Matter of Telecom Capital Group
21790 Point Lookout Road
Leonardtown, Maryland

Case No. CUAP #15-135-008

DECISION AND ORDER**Introduction**

Telecom Capital Group (hereinafter "Applicant") filed an application for a conditional use permit pursuant to Chapter 25 of the St. Mary's County Comprehensive Zoning Ordinance (hereinafter the "Ordinance") regarding property described as 21790 Point Lookout Road, Leonardtown, Maryland (hereinafter the "Property"). The application seeks a permit to construct a commercial communications tower.

After due notice, a public hearing was held at 6:30 p.m. on October 13, 2016, at the St. Mary's County Governmental Center at 41770 Baldrige Street in Leonardtown, Maryland. All persons desiring to be heard were heard after being duly sworn and documentary evidence was received. The proceedings were recorded electronically.

Legal Standard

The Board shall not approve a conditional use unless it finds, based on the evidence, that:

1. The conditional use complies with the standards of the district in which it is to be located and standards applicable to that use;
2. The establishment, maintenance, and operation of the conditional use will not be detrimental to or endanger the public health, safety, convenience, morals, order, or general welfare;
3. The conditional use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, and will not substantially diminish or impair property values within the neighborhood;
4. The proposed use at the proposed location will not have adverse effects above and beyond those inherently associated with the proposed use irrespective of its location within the zoning district;
5. Adequate utilities, access roads, drainage, and/or necessary facilities have been or are being provided;
6. Adequate measures have been or will be taken to provide ingress and egress following a design that minimizes traffic congestion in the public streets;

7. The proposed conditional use is not contrary to the goals, objectives, and policies of the Comprehensive Plan; and
8. The conditional use shall, in all other respects, conform to the applicable regulations of the district in which it is located or to the special requirements established for the specific conditional use in Chapter 51.

Findings of Fact

The Property is an improved five-acre lot containing a single-family dwelling and out-buildings. The Property is essentially a farm field with little vegetation. However, the property to the east, shown as parcel 80 on the site plan, is largely wooded and will provide a partial buffer from the tower facility. Parcel 80 is also owned by Justin Browne and Bonnie Williams, the owners of the Property..

Entrance to the Property is by way of an existing 16-foot gravel driveway off Point Lookout Road or Maryland Route 5. The Applicant plans to construct a 10-foot wide gravel driveway off the existing 16-foot gravel drive to provide access to the fenced lease area. Traffic to the Tower site will be minimal once construction has been completed. Any equipment problem can typically be handled remotely. On average one visit every month or two may occur.

The Applicant proposes to construct a monopole style, commercial communication tower (the "Tower") at an elevation of 195 feet above ground level (AGL) with a lightning rod attached atop the tower. The Tower will be constructed within a gravel lease area measuring 80 feet by 80 feet or 6,400 square feet. The lease area will be enclosed by an eight-foot high, white vinyl fence.

The Tower's design and structural capacity will support five (5) service providers including Verizon Wireless. The County does not plan to place antennae on the Tower as the Tower site is not needed to support the County's 911 service.

The nearest property boundary is 100 feet east of the proposed Tower. The Tower will be located approximately 354 feet north of Point Lookout Road and about 360 feet from the nearest structure, which is a house.

Additional specific findings are as follows:

1. There is a gap in the coverage provided by existing towers in the geographic area to be served by the proposed tower.

2. The proposed tower would provide coverage in the geographic area for which coverage is not provided by existing towers.

3. The RF Report containing the information required by Section 53.3.91.b.(1)(a) through 53.3.91.b.(1)(d) of the St. Mary's Comprehensive Zoning Ordinance was submitted by the Applicant.

4. A detailed engineering analysis of the proposed new tower which included a summary of the proposed tower's capacity to provide space for future co-location by others was provided.

5. The specific type of tower to be constructed and the proposed materials to be used in the construction of the tower was identified.

6. The design of the proposed tower has been sealed by a licensed engineer licensed to practice in the State of Maryland.

7. All noise, odor and other potential nuisance producing facilities, appurtenances and/or outbuildings, or the like, that are associated with the proposed use were identified.

8. The maximum number of antennae and co-location spaces that can safely be placed on the tower were identified. An engineering statement was submitted that the proposed tower can accommodate a minimum of three (3) users.

9. An elevation drawing depicting the tower at its proposed height with all the planned antennae shown was submitted.

10. An engineering statement prepared by a licensed professional engineer describing the contained fall design of the tower in the event of a structural failure was provided.

11. Evidence that at least one telecommunications carrier has agreed to locate antennae on the tower was provided.

12. Co-location on existing commercial towers, public safety towers, or other appropriate structures is not feasible.

13. The proposed site results in fewer or less severe impacts than any feasible alternative site.

14. The tower is being constructed at the minimum height to obtain reasonable signal coverage.

15. The site is large enough to accommodate the tower and all related structures, equipment and appurtenances.
