

ST. MARY'S COUNTY BOARD OF APPEALS

In the Matter of Martha Lloyd
48118 Post Oak Road, St. Inigoes, Maryland

Case No. VAAP #18-0154

DECISION AND ORDER

Introduction

Martha Lloyd (hereinafter "Applicant"), filed an application for a variance from the regulations of the St. Mary's County Comprehensive Zoning Ordinance (hereinafter the "Ordinance") regarding property located at 48118 Post Oak Road, St. Inigoes, Maryland (hereinafter the "Property"). The Applicant seeks a variance from Section 71.8.3 of the Comprehensive Zoning Ordinance to disturb the Critical Area Buffer to disturb the expanded buffer from an intermittent stream to add a deck to the existing single-family dwelling.

After due notice, a public hearing was conducted at 6:30 p.m. on April 12, 2018, at the St. Mary's County Governmental Center at 41770 Baldrige Street, Leonardtown, Maryland. All persons desiring to be heard were heard after being duly sworn, documentary evidence was received, and the proceedings were recorded electronically.

Legal Standard

The Board shall not vary the regulations of the Ordinance unless it finds, based on the evidence, that:

- a. Special conditions or circumstances exist that are peculiar to the land or structure involved and that strict enforcement of the Critical Area provisions of this Ordinance would result in unwarranted hardship.
- b. Strict interpretation of the Critical Area provisions of this Ordinance will deprive the applicant of rights commonly enjoyed by other properties in similar areas within the Critical Area of St. Mary's County.
- c. The granting of a variance will not confer upon an applicant any special privilege that would be denied by the Critical Area provisions of this Ordinance to other lands or structures within the Critical Area of St. Mary's County.
- d. The variance request is not based upon conditions or circumstances that are the result of actions by the applicant.
- e. The granting of a variance will not adversely affect water quality or adversely impact fish, wildlife, or plant habitat within the Critical Area, and that the granting of a variance will be in harmony with the general spirit and intent of the Critical Area program.

- f. The variance is the minimum necessary to achieve a reasonable use of the land or structures.

Findings of Fact

The subject property (the “Property”) is a grandfathered lot in the Critical Area of St. Mary’s County because it was recorded in the Land Records of St. Mary’s County prior to the adoption of the Maryland Critical Area Program on December 1, 1985. The existing single-family dwelling was built in 1980 according to Real Property Data, Maryland Department of Assessments and Taxation.

The Property fronts an intermittent stream and is constrained by the stream buffer (the “Buffer”), which has been measured 100 feet landward from the bank of the intermittent stream pursuant to *Comprehensive Zoning Ordinance Section 71.4.2*, and then expanded to include steep slopes and highly erodible soils on the Property in accordance with *Comprehensive Zoning Ordinance Section 71.8.3*.

The existing soil type on the Property is Croom Gravelly Sandy Loam (CrD2) according to the Natural Resources Conservation Service, U.S. Department of Agriculture, Web Soil Survey. This soil type is considered moderately erosive and is found on 10-15 percent slopes. The hazard of further erosion is severe.

According to the site plan provided by the Applicant, and as shown in the table below, the Property contains a single-family dwelling with two decks, a shed, walk, concrete patio, and driveway for a total of 3,423 square feet of lot coverage. The Applicant plans to construct an 884 square-foot deck and stairs. The deck will be replacing an existing 240 square-foot deck and will be constructed over 270 square feet of existing lot coverage. The total increase in new lot coverage will be 374 square feet for a sum of 3,557 square feet. The proposed lot coverage comprises a deck and stairs, which represents 2.91 percent of the Property. The allowed amount of lot coverage on a property of this size is 5,445 square feet.

Property lot coverage in square footage (acreage: 30,305 square feet)					
Existing	To be replaced/over existing	Remaining	Proposed	Following construction	Allowed
3,423	510	3,183	884	3,557	5,445
Buffer lot coverage in square footage					
Existing	To be replaced/over existing	Remaining	Proposed	Total	Net increase in Buffer
3,423	510	3,183	884	3,557	374
